

**Table P7. Residential Petroleum Product Consumption Estimates, 1960-90 (thousand barrels)**

Distillate		
Year	Fuel	LPG <sup>1</sup>
1960	262	506
1961	335	616
1962	335	560
1963	328	499
1964	312	655
1965	277	636
1966	286	758
1967	196	994
1968	250	1,068
1969	289	1,072
1970	249	887
1971	397	905
1972	436	1,094
1973	495	965
1974	542	1,026
1975	589	973
1976	646	993
1977	616	993
1978	657	1,276
1979	675	606
1980	421	829
1981	273	503
1982	352	736
1983	449	901
1984	459	428
1985	345	604
1986	351	641
1987	247	709
1988	235	715
1989	366	831
1990	288	813
1991	356	703
1992	218	598
1993	267	548
1994	189	541
1995	252	473
1996	438	519
1997	910	152
1998	461	86
1999	256	342

<sup>1</sup> DOE has numerous caveats on its allocation of LPG consumption to the various sectors.

**NOTE:** This table excludes a small amount of kerosene consumption, which could not be estimated accurately by DOE models.

DOE models provide the best consumption estimates available. However, some of the more dramatic year-to-year variation in consumption levels may be due to the models themselves or to changes in the models or data sources.
